7. Evaluating Progress Toward Measurable Goals MCM 4

Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

The MCM 4 goals identified in the SWMP include the requirement that all projects disturbing more than 1 acre have a SWPPP and E&SC plan prepared and approved by the Town. Active construction sites disturbing more than 1 acre will be routinely inspected by the Town's SMO, and deficiencies sited as necessary. The Town also requires contractors working on those projects to document that they have attended the required 4-hour NYSDEC training course.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

There were three projects appearing before the Planning Board that has the SWPPPs reviewed by the Town Engineer C.T. Male Associates during this reporting period. There was one active construction project with a SWPPP during the reporting period- the National Grid Transmission project that the Town MS4 coordinator (the Highway Superintendent) periodically inspects. The Town also receives weekly SWPPP inspections via email from National Grid's qualified inspector.

C. How many times was this observation measured or evaluated in this reporting period?

1

(ex.: samples/participants/events)

D. Has your MS4 made progress toward this measurable goal during this reporting period?

◉ Yes ○ No

E. Is your MS4 on schedule to meet the deadline set forth in the SWMPP?

◉ Yes ○ No

F. Briefly summarize the stormwater activities planned to meet the goals of this MCM during the next reporting cycle (including an implementation schedule).

The Town will continue to review SWPPPs, E&SC plans and perform construction site inspections as new projects develop.

6. Evaluating Progress Toward Measurable Goals MCM 5

Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

The MSM5 goals identified in the SWMP include the requirement that all projects meeting DEC criteria have a SWPPP with post-construction stormwater management controls that is reviewed by the Town. The SWPPP shall adhere to the stormwater management design requirements in the most recent version of the NYS Stormwater Management Design Manual. The Town shall also have an inventory and periodically inspect/maintain post-construction stormwater management practices.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

During this reporting period, there were 3 projects before the Town that required preparation of a SWPPP with post-construction controls. The Town retains C.T. Male Associates to perform review of the plans submitted to the Town. One project was being constructed. The Town does not own any post-construction stormwater controls, other than typical roadside swales and culverts. The Town inspects all swales and culverts on a regular basis.

C. How many times was this observation measured or evaluated in this reporting period?

F. Briefly summarize the stormwater activities planned to meet the goals of this MCM during the next reporting cycle (including an implementation schedule).

The Town will continue to review SWPPPs with post-construction stormwater controls as new projects develop. The Town will continue routine inspections of roadside swales and culverts, and perform maintenance as necessary.
